

Objet : Nouvelles fonctionnalités GapSQL de la version 4.0.3.22

Chers clients,

Vous trouverez ci-dessous, les explications concernant les nouveautés programmées et disponibles dans le programme GapSQL. En effet, grâce à vos suggestions, le programme ne cesse de s'améliorer.

Fichier

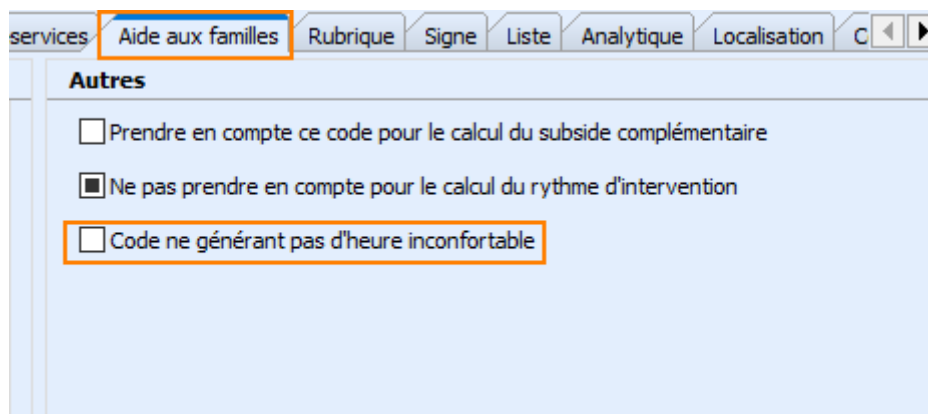

Fichier => Code de prestation => Aide aux familles

Nous avons ajouté une option dans la configuration des codes de prestation pour la gestion des heures inconfortables dans le calcul des subsides.

Si un service (en Région Wallonne) ne paie pas de supplément à son travailleur pour des heures de samedi, dimanche, inconfortable matin ou soir, elle ne peut pas demander le supplément au subside.

Il est donc nécessaire de pouvoir indiquer si oui ou non un code de prestation peut générer de l'inconfortable pour le subside.

Dans le code de prestation, l'option 'Code ne générant pas d'heure inconfortable' a été ajoutée.

On tient compte de cette option dans :

- L'impression du F54,
- Le calcul du subside trimestriel,
- Le calcul du subside complémentaire,
- Le calcul du subside non marchand,
- Le calcul des subsides PSL qui se basent sur les inconfes RW.

Agendas

Agendas => Agenda => F54

Dorénavant, il y aura une distinction entre chaque code de prestation dans la vue F54. Le programme ira rechercher la couleur appliquée au code de prestation et s'affichera uniquement sur la colonne 'CP Code'

Titres services => Importation

Comme annoncé lors d'une newsletter en date du 30 octobre (Format fichier Sodexo-GAP), Sodexo a changé le format de fichier pour l'export des prestations (fichier généré via l'interface Sodexo pour mettre dans GapTime).

À partir de cette version, le programme charge le fichier avec le format '.xlsx'. Pour le fichier '.csv' il faudra être vigilant, Gap acceptera uniquement le CSV de la nouvelle interface. Il vous sera donc impossible de charger dans le programme le fichier dans l'ancienne interface Sodexo.

Configuration
